Warrington, Cheshire | 07464 800932 | lplooking135@outlook.com

Portfolio: pricylewis.github.io | GitHub: github.com/PriceyLewis | LinkedIn: linkedin.com/in/lewis-price-profile

PROFESSIONAL PROFILE

First Class Computer Science graduate and 1st Line Service Desk Analyst handling approximately 60-100 support calls per day in a business-critical multi-site retail environment. Combines commercial incident ownership with hands-on software engineering across Python, Java, Django, React Native, Linux and SQL. Experienced in server, endpoint, POS/till and SSBT troubleshooting, remote diagnostics, system monitoring, user access and third-party escalation. Public portfolio demonstrates end-to-end delivery across web, mobile, desktop and security-focused applications.

CORE TECHNICAL CAPABILITY

Support & Operations: Incident triage; service requests; SLA awareness; ticket documentation; escalation; user access

Systems & Remote Support: Windows; Linux; Microsoft 365; SharePoint; TeamViewer; VNC; Remote Desktop

Development: Python; Django; Java; JavaScript; TypeScript; React Native; Expo; PySide6 / Qt

Data & Persistence: SQL; SQLite; Microsoft Access; UCanAccess; AsyncStorage; CSV import/export

Infrastructure & Monitoring: Network diagnostics; server/desktop support; Nexus; Dispatcher; POS/tills; SSBT

Security & Quality: SC-900; ClamAV integration; Playwright; pytest; Git / GitHub; GitHub Actions; browser testing

PROFESSIONAL EXPERIENCE

1st Line Service Desk Analyst - Betfred, Warrington | Jul 2025 - Present

- Handle approximately 60-100 support calls per day, providing first-line technical support to retail sites in a high-volume, business-critical environment.
- Diagnose incidents from routine service requests and user-access issues through to server faults and complete site outages that can prevent a shop from trading.
- Troubleshoot Windows PCs, store servers, POS/till systems and SSBT devices, using Nexus and Dispatcher to identify outages, server issues and data delays.
- Use TeamViewer and VNC for remote diagnosis and resolution, documenting evidence and escalating complex or restricted faults to the correct second-line or specialist route.
- Coordinate incidents with TalkTalk, Playtech and field engineers, communicating technical findings and following faults through to resolution to minimise operational disruption.

Earlier Customer-Facing Experience - Asda Living & Gulliver's World | Oct 2021 - Jul 2025

- Built a strong service and communication foundation in high-volume retail and hospitality roles, including handling up to 200 transactions per day and resolving customer queries under pressure.

SELECTED TECHNICAL PROJECTS

Portfolio case studies and source links: priceylewis.github.io

PredictMyGrade | Python | Django | SQLite | Playwright

- Built a full-stack academic analytics application with authentication, persisted academic data, dashboards, study planning, forecasting-style workflows and demo-safe premium journeys.
- Owned Django architecture, UX consistency, feature gating, fallback behaviour and browser-level Playwright smoke tests; public demo uses explicit mock billing and deterministic local AI behaviour.

Guardian Antivirus | Python | PySide6 / Qt | ClamAV | SQLite | Linux

- Developed a Linux desktop security application with malware scanning, asynchronous filesystem monitoring, quarantine workflows, scan history and user-facing protection controls.
- Integrated ClamAV daemon/CLI scanning, safe file handling and automated pytest regression coverage while documenting target-machine limitations and avoiding overstated security claims.

Student Toolkit OS | React Native | Expo | TypeScript | AsyncStorage

- Built a local-first cross-platform mobile app covering academic planning, habits, fitness, career progress and side-income goals, with analytics and scheduled notifications.
- Designed shared state, reusable components, persistent on-device storage and validated backup/restore with rollback; GitHub Actions runs ESLint and TypeScript checks.

Academic Performance Calculator - Dissertation | Java | Swing | UCanAccess | Microsoft Access

- Developed an end-to-end Java desktop application for module management, weighted grade tracking, CSV import/export, database backup/load, charts and outcome forecasting.
- Combined event-driven UI development, validation, persistence, recoverability, visualisation and prediction logic in a First Class final-year dissertation; repository includes compile CI.

EDUCATION & CERTIFICATIONS

BSc (Hons) Computer Science - First Class Honours | Edge Hill University | 2025

Relevant study: Object-Oriented Programming, Databases & Data Analytics, Statistical Modelling, Complex Systems, Internet Security, Information Systems & Design, Research & Development Methods.

BTEC Level 3 Diploma - Information Technology | Priestley College, Warrington | 2022

Microsoft Certified: Security, Compliance, and Identity Fundamentals (SC-900) - Completed

Microsoft Azure Fundamentals (AZ-900) - In progress

ADDITIONAL TECHNICAL PROJECT

PC Part Picker Tool - Java team coursework: Developed database-backed desktop workflows for component search/filtering, basket, reviews and history. The curated public demo replaces cloud dependencies with a deterministic local rule-based assistant and includes automated compile checks.

Public project evidence, case studies and source repositories are available at priceylewis.github.io
